About Logo

1.1

The primary visual expression that we use to identify ourselves meaning that we need to be careful to use it correctly and to do so consistently. The logo is the brand identifier commonly used in almost all applications.

Use and Variants

Correct Variations

Whenever possible, the brand will be applied in its main version with its respective colors. In case it is not possible for technical reasons, the positive or negative version will be used.

Monochromatic Version

It is the version of the logo that, due to reproduction or application needs, is reproduced only as a continuous spot, without gradients or shading.

It will be used in many media and applications that require a monochrome version of the logo.

Monochromatic Version
